EDUCATION

Columbia University | New York, NY — Aug 2026 - May 2028
Bachelor of Science, Computer Science (expected May 2028)

DePauw University | Greencastle, IN — Jan 2024 - May 2026
Bachelor of Arts, Pre-Engineering | **GPA: 3.78/4.0**
Honors: DePauw Distinguished Scholarship; Dean's List, Spring/Fall 2024 and 2025
Selected coursework: Human-Computer Interaction, Game Development, Data Structures, Computer Systems, Software Development, Linear Algebra, Discrete Mathematics, Calculus III

RESEARCH INTERESTS

Human-AI and Human-Agent Interaction; AI for Social Science; Human-Centered Evaluation of LLMs; Mobile Health, Wearable Computing, and Personal Health Informatics
Interested in using AI to study human beliefs, judgments, and behavior, and in designing evidence-grounded AI interactions that help people interpret mobile and wearable health data.

RESEARCH EXPERIENCE

Columbia University | Advisor: **Prof. Xia Zhou** — Ongoing

Same Data, Different Judgments? Sycophancy in LLM Interpretations of Wearable Health Data

- Investigating whether users' stated beliefs shift LLM interpretations of identical wearable health records, and whether users mistake model agreement for data-supported evidence.
- Developed a research proposal for controlled comparisons of positive, negative, and neutral user framing, assessing factual accuracy, evidence use, judgment shifts, and expressed uncertainty.
- Specified repeated model trials and a response-coding plan to distinguish friendly language from unsupported judgment shifts, including cases where new factual context justifies a changed assessment.
- Proposed an interactive prototype separating device-recorded data, user-reported context, and model inferences, allowing users to inspect which conclusions change when context is added.
- Outlined a user study comparing standard chat with the proposed interface, measuring evidence-source understanding, judgment quality, information choices, perceived effort, and respect for user input.

Publication goal: Full-paper submission to ACM CHI or PACM IMWUT (UbiComp).

TECHNICAL SKILLS

Programming Languages: Python, Java, R, C++
Design & Development: Figma, Godot | **Hardware:** Arduino | **Tools:** Microsoft Office Suite

PROFESSIONAL EXPERIENCE

SWS Securities Research Co. Ltd. | Shanghai, China — Jun 2026 - Jul 2026
Technology, Equity Research Intern

- Conducted industry research on the server power supply sector, examining market trends, competitive dynamics, and technology roadmaps; contributed investment insights to equity research reports.
- Participated in client roadshows, presenting technology-sector analysis and stock views to institutional investors.

Galaxy Futures Co. Ltd. | Shanghai, China — Jun 2025 - Aug 2025
Strategic Account Unit Intern

- Conducted product research on crude oil, gold, and sugar futures, analyzing market trends and preparing reports to support trading decisions.
- Organized and led daily briefings on international and domestic futures markets, highlighting volatile commodities and macroeconomic developments to support team awareness and client communication.
- Supported institutional client relationships by addressing inquiries, sharing market updates, and preparing customized analyses for strategic partners.
